

**What are Occupational Standards (OS)?**

- OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- OS are performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

3. Glossary of Key Terms .....P.3
4. NOS Units.....P.5

**Introduction**

**Qualifications Pack – Iron & Steel – Fitter: Electronic Assembly**

SECTOR: Iron & Steel

SUB-SECTOR: Electrical Maintenance

REFERENCE ID: ISC/Q0902

ALIGNED TO: NCO-2004 / NIL

Title of Job : This job is all about assembling and wiring up electronic equipment and systems to mechanical equipment. It involves the assembly of the electronic products, inclusive of components, sub-assemblies, or completed equipment/systems. Along with soldering techniques and anti-static protection techniques assemble with the mechanical equipment.

Personal Attributes: The candidate should possess basic communication, numerical and computational abilities. Openness to learning, ability to plan and organize own work and identify and solve problems in the course of working. Understanding the need to take initiative and manage self and work to improve efficiency and effectiveness.

Job Details

Qualifications Pack Code	ISC/Q0902		
Job Role	Iron & Steel – Fitter: Electronic Assembly		
Credits(NSQF)	TBD	Version number	1.0
Industry	Iron & Steel	Drafted on	21/07/2014
Sub-sector	Electrical Maintenance	Last reviewed on	30/12/2014
Occupation	Fitter	Next review date	30/12/2015

Job Role	Iron & Steel – Fitter: Electronic Assembly
Role Description	Operations to assemble and wire up electronic panels/components and equipments and systems to mechanical equipment.
NSQF level	3
Minimum Educational Qualifications	12 <sup>th</sup> standard (Science) / ITI Pass
Maximum Educational Qualifications	Diploma - Electronics
Training (Suggested but not mandatory)	<ul style="list-style-type: none"> <li>Theoretical concepts on electronic panels and equipment handling</li> <li>Trainings on operation of electronic panels/components and equipments</li> </ul>
Experience	In lieu of minimum qualification the incumbent should have minimum 12 months of relevant experience in the similar field/function.
Occupational Standards (OS)	<p>Compulsory:</p> <p><a href="#">CSC/N0402: Assemble and wire up electronic equipment and systems to mechanical equipment</a>  <a href="#">ISC/N0008: Use basic health and safety practices at the workplace</a>  <a href="#">ISC/N0009: Work effectively with others</a></p> <p>Optional: N/A</p>
Performance Criteria	As described in the relevant NOS units

Definitions

Keywords /Terms	Description
Core Skills/Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the NOS, these include communication related skills that are applicable to most job roles.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of NOS.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
National Occupational Standards (NOS)	NOS are Occupational Standards which apply uniquely in the Indian context.
Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
Organisational Context	Organisational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
Qualifications Pack(QP)	Qualifications Pack comprises the set of NOS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
Scope	Scope is the set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on the quality of performance required.
Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.

Sub-Sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Sub-functions	Sub-functions are sub-activities essential to fulfil the achieving the objectives of the function.
Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Unit Code	Unit Code is a unique identifier for a NOS unit, which can be denoted with an 'N'.
Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
Vertical	Vertical may exist within a sub-sector representing different domain areas or the client industries served by the industry.
Keywords /Terms	Description
NOS	National Occupational Standard(s)
NSQF	National Skills Qualifications Framework
OEM	Original Equipment Manufacturer
OS	Occupational Standard(s)
QP	Qualifications Pack
5 S	Technique of maintaining orderliness –Japanese terminology
CP	Control Plan
WI	Work Instructions

CSC/N0402: Assemble and wire up electronic equipment and systems to mechanical equipment

---

# National Occupational Standards

---

## **Overview**

This unit covers operations to assemble and wire up electronic equipment and systems to mechanical equipment

Unit Code	CSC/N0402
Unit Title (Task)	Assemble and wire up electronic equipment and systems to mechanical equipment
Description	<p>This unit covers the skills and knowledge needed to assemble and wire up electronic products, inclusive of components, sub-assemblies, or completed equipment/systems to mechanical equipment, in accordance with approved procedures.</p> <p>The candidate's responsibilities will require them to comply with organizational policy and procedures for the electronic assembly and wiring activities undertaken, and to report any related problems that they cannot personally resolve, or are outside their permitted authority, to the relevant people. They will be expected to work with a minimum of supervision, taking full responsibility for their own actions and for the quality and accuracy of the work that they carry out.</p>
Scope	<p>This unit/task covers the following:</p> <ul style="list-style-type: none"> <li>Working safely all the time</li> <li>Assembling and wiring up electronic equipment and systems to mechanical equipment</li> </ul>
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Working safely all the time	<p>The user/individual on the job should be able to:</p> <p>PC1. Adhere to procedures or systems in place for safety, including personal protective equipment (PPE), other relevant health and safety regulations and guidelines</p> <p>PC2. Ensure that the components are free from damage, foreign objects, dirt or other contamination</p> <p>PC3. Check that tools and equipment to be used are in a safe, tested, calibrated and usable condition</p> <p>PC4. Where appropriate, apply procedures and precautions to eliminate electrostatic discharge (ESD) hazards (e.g. the use of grounded wrist straps and mats)</p>
Assembling and wiring up electronic equipment and systems to mechanical equipment	<p>The user/individual on the job should be able to:</p> <p>PC5. Follow the relevant instructions, assembly drawings and any other specifications. Documents during the assembly activities:</p> <ul style="list-style-type: none"> <li>Assembly drawings and charts</li> <li>Interconnection net diagrams</li> <li>Schedules of specified components</li> <li>Wiring specifications</li> <li>Wire running lists</li> </ul> <p>PC6. Ensure that the specified components are available and that they are in a usable condition.</p>

Prepare components and complete the preparatory assembly:

- Use hand tools/automated tools for securing all fastenings
- Assemble sub-units to support housings/brackets
- Assemble connectors and allied devices

PC7. Obtain, check and prepare consumables and specialized tools to be used for the wiring and interconnections. Check and prepare consumables and tools:

- Older and any associated fluxes (e.g. Sufficient quantity, right type, good condition)
- Wire strippers and cutters (e.g. Right size, good condition)
- Authorized crimp tooling and attachments (e.g. Checked for sizes, calibration and condition)
- Cables and individual wiring/fibre optic links (e.g. Correct sizes and types, good condition)
- Cable strapping obtained and cut to nominal length (e.g. Right sizes and sufficient quantities)

PC8. Use the appropriate methods and techniques to assemble the components in their correct positions. Methods and techniques:

- Set up, programme and use automated wiring termination equipment (where appropriate)
- Attach wire terminations by appropriate method/s (e.g. Soldering, crimping)
- Set out/position interconnection wiring
- Bundle/strap/tie wiring looms and cables
- Cut wires to required length
- Set out and terminate any fibre optic links
- Strip insulation from ends of wires assemble electronic equipment or systems, in compliance with one or more of the following:
  - National and international wiring regulations
  - National and international standards and procedures
  - Company standards and procedures

PC9. Secure the components using the specified connectors and securing devices

PC10. Obtain, check and prepare components, and complete the preparatory assembly

PC11. Check the completed assembly to ensure that all operations have been completed and the finished assembly meets the required specification.

Preliminary checks on the completed work for the following:

- Security of all assembled and interconnected items
- Insulation resistance between housing assembly and interconnection wiring
- Continuity of all interconnections
- Unwanted short circuits between wires

PC12. Select the appropriate software

PC13. Load appropriate software on electronic components in accordance with laid down procedures

PC14. Check the output of software as per procedure

PC15. Check the functionality of the completed electronic assembly

PC16. Leave the work area in a safe and tidy condition on completion of the electrical equipment assembly activities use the correct issue of drawings, job instructions and specifications

PC17. Follow risk assessment procedures and regulations

	<p>PC18. Follow clean work area protocols</p> <p>PC19. Carry out the assembling and wiring activities in line with organizational procedures</p> <p>PC20. Create and store records of the activities, in accordance with appropriate procedures</p>
<b>Element</b>	<b>Knowledge and Understanding (K)</b>
A. Organisational Context (Knowledge of the Company/ Organisation and its processes)	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. Relevant standards, policies, and procedures followed in the company</p> <p>KA2. Relevant health and safety requirements of the work</p> <p>KA3. The organizational process or procedure for assembly and wiring</p> <p>KA4. Responsibilities with regard to the reporting lines and procedures in the working area</p> <p>KA5. Appropriate people and their responsibilities within the candidate's working area</p> <p>KA6. To whom they should report if they have problems that they cannot resolve</p> <p>KA7. The importance of leaving the work area in a safe and clean condition on completion of the electronic assembly and wiring activities (e.g. returning tools and equipment to the designated location, cleaning the work area, removing and disposing of waste)</p>
B. Technical Knowledge	<p>The user/individual on the job needs to know and understand:</p> <p>KB1. The specific safety precautions to be taken when working with soldering and crimping equipment/tools and wiring aids within an electronics assembly and wiring environment (e.g. avoiding hot solder splashes and flying ends from cut wires)</p> <p>KB2. The personal protective equipment (PPE) to be worn whilst carrying out the electronic wiring activities concerned, for both personal protection and protection of the components and circuits (e.g. protective outer clothing, eye and hearing protection, anti-static devices)</p> <p>KB3. Regulations and standards that are relevant to electronic wiring and assembly being undertaken</p> <p>KB4. How mechanical assembly instructions are represented and how to interpret them</p> <p>KB5. The general principles of wiring and assembly, the range of methods used, and key features of each (e.g. tin/lead soldering, lead-free soldering systems, no-wash fluxing, crimping)</p> <p>KB6. how the different types of electronic wiring and insulation are coded and specified</p> <p>KB7. How information on wiring interconnections is specified, with particular reference to the role of wiring schedules, wire-running lists, backplane net interconnect lists</p> <p>KB8. The various methods used for securing electronic wiring (e.g. heat shrink sleeves, strapping, cable ties, p-clips)</p> <p>KB9. The care and selection of tools and aids used in wiring and assembly work (e.g. soldering tools and equipment, crimp tools, testing and checking equipment for continuity, short circuit testing, joint/crimp 'pull-off' security, insulation resistance)</p>

	<p>KB10. How to recognize wiring types and sizes, their identification, coding and range of termination methods</p> <p>KB11. How to identify the types and read the values of electronic components (e.g. resistors, capacitors, diodes, integrated circuits) with particular reference to their polarity, orientation, colour coding, value, tolerance, working voltage/current</p> <p>KB12. How to take anti-static precautions in relation to component handling during the wiring and assembly of electronic products, and when such precautions are needed</p> <p>KB13. The handling requirements and termination methods used for fibre-optic links</p> <p>KB14. The range of checks and tests used within wiring and assembly work (e.g. insulation resistance, flashover testing, continuity, short circuit testing)</p> <p>KB15. Calibration requirements for tools and equipment used in wiring (e.g. crimp tool test and selection for wire sizes, 'pull-off' limits, meters for continuity and insulation resistance checks)</p> <p>KB16. Importance of and maintain dust free environment for electronic assembly</p> <p>KB17. Handling multi-layered populated PCB's</p> <p>KB18. The documentation completion requirements for the work undertaken</p> <p>KB19. The problems that can occur with wiring and assembly work, and how they can be avoided</p> <p>KB20. Basic units used in electronic technology</p> <p>KB21. Function of electrical components</p> <p>KB22. Application of electrical components</p> <p>KB23. Current and voltage distribution in series and parallel circuits</p> <p>KB24. Magnetic fields for bar magnets in various configurations</p> <p>KB25. Polarity of a solenoid</p> <p>KB26. Construction of a typical capacitor</p> <p>KB27. Sine wave as displayed on an oscilloscope</p> <p>KB28. Determining input and output voltage of double wound transformers</p> <p>KB29. How to construct a simple bridge rectifier circuit and its function</p>
<b>Skills (S) w.r.t. the scope</b>	
<b>Element</b>	<b>Skills</b>
A. Core Skills/ Generic Skills	<p>Communication</p> <p>The user/ individual on the job needs to know and understand how to:</p> <p>SA1. Read and interpret information correctly from various job specification documents, manuals, health and safety instructions, memos, etc. applicable to the job in English and/or local language</p> <p>SA2. Fill up appropriate technical forms, process charts, activity logs as per organizational format in English and/or local language</p> <p>SA3. Convey and share technical information clearly using appropriate language</p> <p>SA4. Check and clarify task-related information</p> <p>SA5. Liaise with appropriate authorities using correct protocol</p> <p>SA6. Communicate with people in respectful form and manner in line with organizational protocol</p> <p>Numerical and computational skills</p>

	<p>The user/individual on the job needs to know and understand how to:</p> <p>SA7. Undertake numerical operations, and calculations/ formulae          SA8. Identify and draw various basic, compound and solid shapes as per dimensions given          SA9. Use appropriate measuring techniques and units of measurement          SA10. Use appropriate units and number systems to express degree of accuracy          SA11. Use basic geometrical calculations (area, perimeter, radii, etc.) for plane figures          SA12. Use basic algebra to solve linear equations          SA13. Use basic calculations with positive, negative and fractional indices          SA14. Use appropriate measuring techniques</p>
<p>B. Professional Skills</p>	<p>Problem Solving</p>
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB1. Identify problems with work planning, procedures, output and behaviour and their implications          SB2. Prioritize and plan for problem solving          SB3. Communicate problems appropriately to others          SB4. Identify sources of information and support for problem solving          SB5. Seek assistance and support from other sources to solve problems          SB6. Identify effective resolution techniques          SB7. Select and apply resolution techniques          SB8. Seek evidence for problem resolution</p>
	<p>Plan and Organize</p>
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SB9. Plan, prioritize and sequence work operations as per job requirements          SB10. Organize and analyze information relevant to work          SB11. Basic concepts of shop-floor work productivity including waste reduction, efficient material usage and optimization of time</p>
	<p>Self-Management</p>
	<p>The user/individual on the job needs to know and understand:</p> <p>SB12. Importance of taking responsibility for own work outcomes          SB13. Importance of adherence to work timings, dress code and other organizational policies          SB14. Importance of following laid down rules, procedures, instructions and policies          SB15. Importance of exercising restraint while expressing dissent and during conflict situations          SB16. How to avoid and manage distractions to be disciplined at work          SB17. Importance of time management for achieving better results</p>
<p>Teamwork</p>	

The user/individual on the job needs to know and understand how to:

- SB18. Work in a team in order to achieve better results
- SB19. Identify and clarify work roles within a team
- SB20. Communicate and cooperate with others in the team
- SB21. Seek assistance from fellow team members

ISC/N0008: Use basic health and safety practices at the workplace

---

# National Occupational Standards

---

## Overview

This unit covers health, safety and security at the workplace. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment.

Unit Code	ISC/N0008
Unit Title (Task)	Use basic health and safety practices at the work place
Description	<p>This OS unit is about knowledge and practices relating to health, safety and security that candidates need to use in the workplace. It covers responsibilities towards self, others, assets and the environment.</p> <p>It includes understanding of risks and hazards in the workplace, along with common techniques to minimize risk, deal with accidents, emergencies, etc.</p>
Scope	<p>This unit/task covers the following:</p> <ul style="list-style-type: none"> <li>• Health and safety procedures</li> <li>• Fire safety procedures</li> <li>• Emergencies, rescue and first aid procedures</li> </ul>
<b>Performance Criteria (PC) w.r.t. the Scope</b>	
<b>Element</b>	<b>Performance Criteria</b>
Health and safety procedures	<p>The user/individual on the job should be able to:</p> <p>PC1. Use protective clothing/equipment for specific tasks and work conditions</p> <p>Protective clothing includes:</p> <ul style="list-style-type: none"> <li>• Leather or asbestos gloves</li> <li>• Flame proof aprons</li> <li>• Flame proof overalls buttoned to neck</li> <li>• Cuff less (without folds) trousers</li> <li>• Reinforced footwear</li> <li>• Helmets/hard hats</li> <li>• Cap and shoulder covers</li> <li>• Ear defenders/plugs</li> <li>• Safety boots</li> <li>• Knee pads</li> <li>• Particle masks</li> <li>• Glasses/gloves/visors</li> </ul> <p>Equipment includes:</p> <ul style="list-style-type: none"> <li>• Hand shields</li> <li>• Machine guards</li> <li>• Residual current devices</li> <li>• Shields</li> <li>• Dust sheets</li> <li>• Respirator</li> </ul> <p>PC2. State the name and location of people responsible for health and safety in the workplace</p>

Various areas are listed below:

- On chemical containers
- Equipment
- Packages
- Inside buildings
- Open areas and public spaces, etc.

PC3. State the names and location of documents that refer to health and safety in the workplace

PC4. Identify job-site hazardous work and state possible causes of risk or accident in the workplace

Hazards include:

- Working with electrical and thermal tools and equipment
- Sharp edged and heavy tools
- Heated metals
- Oxyfuel and gas cylinders
- Welding radiation
- Surfaces: sharp, slippery, uneven, chipped, broken, etc.
- Substances: chemicals, gas, oxy-fuel, fumes, dust, etc.
- Physical: working at heights, large and heavy objects and machines, sharp and piercing objects, tools and machines, intense light, loud noise, obstructions in corridors, by doors, blind turns, noise, over stacked shelves and packages, etc.
- Electrical: power supply and points, loose and naked cables and wires, electrical machines and appliances, etc.

PC5. Carry out safe working practices while dealing with hazards to ensure the safety of self and others state methods of accident prevention in the work environment of the job role

Safe working practices include:

- Using protective clothing and equipment
- Putting up and reading safety signs
- Handle tools in the correct manner and store and maintain them properly
- Keep work area clear of clutter, spillage and unsafe object lying casually
- While working with electricity take all electrical precautions like insulated clothing, adequate equipment insulation, use of control equipment, dry work area, switch off the power supply when not required, etc.
- Safe lifting and carrying practices
- Use equipment that is working properly and is well maintained
- Take due measures for safety while working in confined places, trenches or at heights, etc. Including safety harness, fall arrestors, etc.

Methods are:

- Training in health and safety procedures
- Using health and safety procedures
- Use of equipment and working practices (such as safe carrying procedures)
- Safety notices, advice
- Instruction from colleagues and supervisors

	<p>PC6. State location of general health and safety equipment in the workplace PC7. Inspect for faults, set up and safely use steps and ladders in general use</p> <p>Faults :</p> <ul style="list-style-type: none"> <li>• Corrosion of metal components</li> <li>• Deterioration</li> <li>• Splits and cracks timber components</li> <li>• Imbalance</li> <li>• Loose rungs</li> <li>• Nuts or bolts, etc.</li> </ul> <p>Set up:</p> <ul style="list-style-type: none"> <li>• Firm/level base</li> <li>• Clip/lash down</li> <li>• Leaning at the correct angle, etc.</li> </ul> <p>PC8. Work safely in and around trenches, elevated places and confined areas PC9. Lift heavy objects safely using correct procedures PC10. Apply good housekeeping practices at all times. Good housekeeping practices:</p> <ul style="list-style-type: none"> <li>• Clean/tidy work areas</li> <li>• Removal/disposal of waste products</li> <li>• Protect surfaces</li> </ul> <p>PC11. Identify common hazard signs displayed in various areas PC12. Retrieve and/or point out documents that refer to health and safety in the workplace</p>
<p>Fire safety procedures</p>	<p>The user/individual on the job should be able to:</p> <p>PC13. Use the various appropriate fire extinguishers on different types of fires correctly.</p> <p>Fire extinguishers:</p> <ul style="list-style-type: none"> <li>• Sand</li> <li>• Water</li> <li>• Foam</li> <li>• Co2</li> <li>• Dry powder</li> </ul> <p>Fires:</p> <ul style="list-style-type: none"> <li>• Class A: Ordinary solid combustibles, e.g. wood, paper, cloth, plastic, charcoal etc.</li> <li>• Class B: Flammable liquids and gases, e.g. gasoline, propane, diesel fuel, tar, cooking oil and similar substances</li> <li>• Class C: Electrical equipment e.g. appliances, wiring, breaker panels etc. (these categories of fires become Class A, B, and D fires when the electrical equipment that initiated the fire is no longer receiving electricity)</li> <li>• Class D: Combustible metals such as magnesium, titanium, and sodium (these fires burn at extremely high temperatures and require special suppression agents)</li> </ul> <p>Causes of fires:</p> <ul style="list-style-type: none"> <li>• Heating of metal</li> </ul>

	<ul style="list-style-type: none"> <li>• Spontaneous ignition</li> <li>• Sparking,</li> <li>• Electrical heating</li> <li>• Loose fires (e.g. Smoking, welding, etc.)</li> <li>• Chemical fires, etc.</li> </ul> <p>PC14. Demonstrate rescue techniques applied during fire hazard            PC15. Demonstrate good housekeeping in order to prevent fire hazards            PC16. Demonstrate the correct use of a fire extinguisher</p>
<p>Emergencies, rescue and first-aid procedures</p>	<p>The user/individual on the job should be able to:</p> <p>PC17. Demonstrate how to free a person from electrocution            PC18. Administer appropriate first aid to victims as required e.g. in case of bleeding, burns, choking, electric shock, poisoning etc.            PC19. Demonstrate basic techniques of bandaging            PC20. Respond promptly and appropriately to an accident situation or medical emergency in real or simulated environments. few General health and safety equipment are mentioned below :</p> <ul style="list-style-type: none"> <li>• Fire extinguishers</li> <li>• First aid equipment</li> <li>• Safety instruments and clothing</li> <li>• Safety installations, e.g. Fire exits, exhaust fans etc.</li> </ul> <p>PC21. Perform and organize loss minimization or rescue activity during an accident in real or simulated environments            PC22. Administer first aid to victims in case of a heart attack or cardiac arrest due to electric shock, before the arrival of emergency services in real or simulated cases            PC23. Demonstrate the artificial respiration and the CPR Process            PC24. Participate in emergency procedures. Emergency procedures are:</p> <ul style="list-style-type: none"> <li>• Raising alarm</li> <li>• Safe/efficient evacuation</li> <li>• Correct means of escape</li> <li>• Correct assembly point</li> <li>• Roll call</li> <li>• Correct return to work</li> </ul> <p>PC25. Complete a written accident/incident report or dictate a report to another person, and send report to person responsible            Incident Report should capture:</p> <ul style="list-style-type: none"> <li>• Name</li> <li>• Date/time of incident</li> <li>• Date/time of report,</li> <li>• Location</li> <li>• Environment conditions</li> <li>• Persons involved</li> <li>• Sequence of events</li> <li>• Injuries sustained</li> <li>• Damage sustained</li> <li>• Actions taken</li> <li>• Witnesses</li> </ul>

	<ul style="list-style-type: none"> <li>• Supervisor/manager notified</li> </ul> <p>Documents:</p> <ul style="list-style-type: none"> <li>• Fire notices</li> <li>• Accident reports</li> <li>• Safety instructions for equipment and procedures</li> <li>• Company notices and documents</li> <li>• Legal documents (e.g. Government notices)</li> </ul> <p>Job titles:</p> <ul style="list-style-type: none"> <li>• Health and safety officer</li> <li>• First aid officer</li> <li>• Fire officer</li> </ul> <p>PC26. Demonstrate correct method to move injured people and others during an emergency</p>
<b>Element</b>	<b>Knowledge and Understanding</b>
<p>A. Organisational Context (Knowledge of the Company/ Organisation and its processes)</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. State the names (and job titles if applicable), and describe where to find, all the people responsible for health and safety in a workplace</p> <p>KA2. State the names and location of documents that refer to health and safety in the workplace</p>
<p>B. Technical Knowledge</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KB3. Meaning of “hazards” and “risks”</p> <p>KB4. Health and safety hazards commonly present in the work environment and related precautions</p> <p>KB5. Possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible</p> <p>KB6. Activities and causes of risk and accident</p> <p>KB7. Methods of accident prevention</p> <p>KB8. Safe working practices when working with tools and machines</p> <p>KB9. Safe working practices while working at various hazardous sites</p> <p>KB10. Where to find all the general health and safety equipment in the workplace</p> <p>KB11. Various dangers associated with the use of electrical equipment</p> <p>KB12. Preventative and remedial actions to be taken in the case of exposure to toxic materials.</p> <ul style="list-style-type: none"> <li>• Exposure: ingested, contact with skin, inhaled</li> <li>• Preventative action: ventilation, masks, protective clothing/equipment</li> <li>• Remedial action: immediate first aid, report to supervisor</li> <li>• Materials: solvents, flux, lead</li> </ul> <p>KB13. Importance of using protective clothing/equipment while working</p> <p>KB14. Precautionary activities to prevent the fire accident</p> <p>Activities and causes:</p> <ul style="list-style-type: none"> <li>• Physical actions</li> <li>• Reading</li> <li>• Listening to and giving instructions</li> </ul>

	<ul style="list-style-type: none"> <li>• Inattention</li> <li>• Sickness and incapacity (e.g. Drunkenness)</li> <li>• Health hazards (e.g. Untreated injuries and contagious illness)</li> </ul> <p>KB15. Various causes of fire            KB16. Techniques of using the different fire extinguishers            KB17. Different methods of extinguishing fire            KB18.
