

QUALIFICATIONS PACK - OCCUPATIONAL STANDARDS FOR MINING INDUSTRY

What are Occupational Standard (OS)?

- OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- OS are performance standard that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

Introduction

Qualifications Pack- Mining Shot Firer or Blaster

SECTOR: MINING

SUB-SECTOR: Open Cast and Underground Mines

OCCUPATION: Mining Operations

REFERENCE ID: MIN/Q 0428

ALIGNED TO: NCO-2004/7112.90

A Mining Shot Firer uses detonation and explosives to demolish structures and clear obstacles and large earth masses.

Brief Job Description: Shotfirer assembles, positions and detonates explosives to break or dislodge rock and soil or to demolish structures. (refer to MMR 1960/ MVTR) In open cast mining operation, shotfirer uses larger amounts of explosives to clear masses of earth in open areas. Numerous smaller blasts are often detonated together to create a larger force. In tunnelling and underground mining operation, shotfirer uses small amounts of explosives to blast through rock underground. Generally, small blasts are detonated in a sequence to minimise the force and decrease the possibility of unwanted damage.

Personal Attributes: This job requires an individual to possess ability to plan and prioritize, quality consciousness, safety orientation, reading, writing and communication skills, Physique to sustain strenuous conditions, Dexterity, Ability to use fingers, hands and feet with ease to complete the assigned task (Dexterity), high precision and sensitivity to problem solving and sensitivity towards safety for self and equipment.

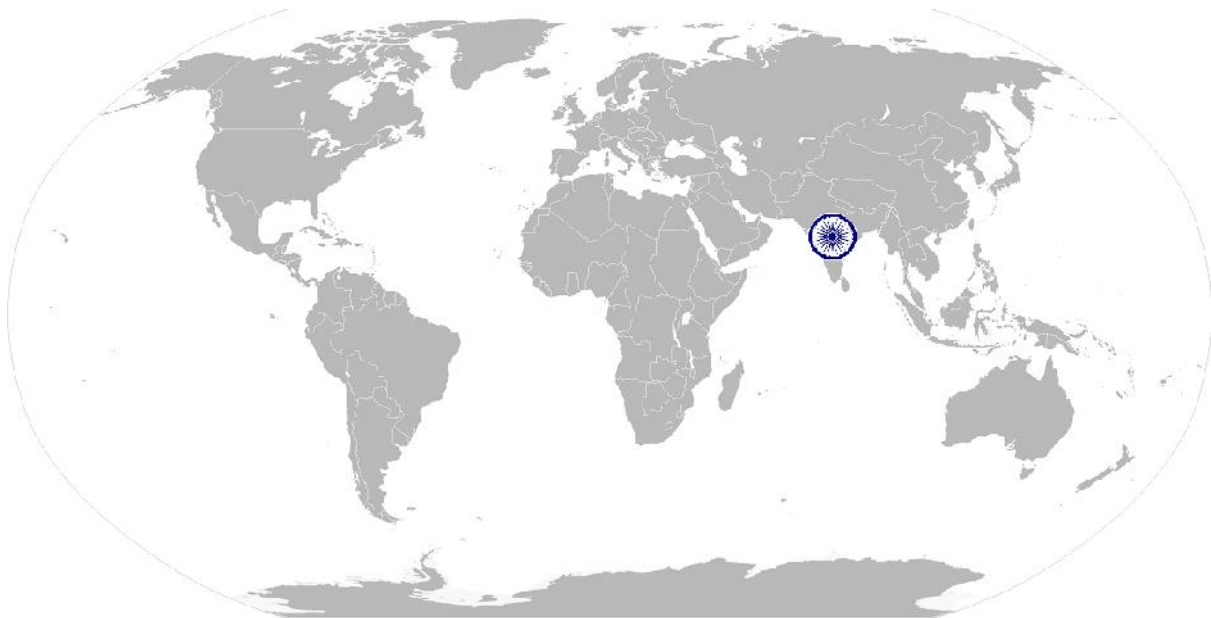

Job Details	Qualifications Pack Code	MIN/ Q 0428		
	Job Role	Shot Firer/ Blaster		
	Credits(NSQF)	TBD	Version number	1.0
	Industry	Mining	Drafted on	15/12/2014

Job Role	Blaster
Role Description	This role assembles, positions and detonates explosives to break or dislodge rock and soil or to demolish structures and is solely responsible for transport and use of Explosives; observance of statutory provisions of CMR 1957 or MMR 1961 and any directives issued thereunder; Charging, Stemming (with suitable stemming material) and firing of each shots and also for any misfire and its dealing procedure; Proper Warning and sheltering of Persons and for any Secondary Blasting
NSQF level Minimum Educational Qualification Maximum Educational Qualification	4 Class X and statutory certificate NA
Training (Suggested but not mandatory)	<ol style="list-style-type: none"> Holder of statutory “Gas Testing Certificate “ in case of Gassy Coal Mines. In all other Case – Not required Latest Blasting techniques and materials Safety and 5S
Experience	2-3 years of experience as explosive carrier
Applicable National Occupational Standards	<p>Compulsory: Click on the hyperlink to read/download the required NOS</p> <ol style="list-style-type: none"> MIN/ N0479 (Receive and Handle Explosive Materials On-Site) MIN/ N0480 (Charge Blast Holes, Blast to Specification and deal with misfires) MIN/ N0901 (Health and Safety) <p>Optional: Not Applicable</p>
Performance Criteria	As described in the relevant OS units

Keywords /Terms	Description
Definitions	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of OS.
Job Role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
OS	OS specify the standard of performance an individual must achieve when carrying out a function in the workplace, together with the knowledge and understanding they need to meet that standard consistently. Occupational Standard are applicable both in the Indian and global contexts.
Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
NOS	NOS are Occupational Standard which apply uniquely in the Indian context.
Qualification Pack Code	Qualification Pack Code is a unique reference code that identifies a qualification pack.
Qualification Pack	Qualification Pack comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A Qualification Pack is assigned a unique qualification pack code.
Unit Code	Unit Code is a unique identifier for an Occupational Standard , which is denoted by an 'N'
Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
Organizational Context	Organizational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills or Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.

Acronyms	Keywords /Terms	Description
	SCMS	Skill council for Mining Sector
	NOS	National Occupational Standard
	NSQF	National Skill Qualification Framework
	NVEQF	National Vocational Educational Qualification Framework
	NVQF	National Vocational Qualification Framework
	OS	Occupational Standard
	PC	Performance Criteria
	QP	Qualification Pack
	SSC	Sector Skill Council

National Occupational Standard

Overview

This unit is about demonstrate competence to carry out preparatory activities for Blasting. This unit covers receiving explosive materials from store and/or delivery vehicle, handling explosive materials on site, determining blast requirements and designing and arranging authorization for blast specification.

MIN/ N0479 Receive and Handle Explosive Materials On-Site

Unit Code	MIN/ N 0479
Unit Title (Task)	Receive and Handle Explosive Materials On-Site
Description	This unit is about demonstrate competence to receive and handle explosive materials. This unit covers receiving explosive materials from store and/or delivery vehicle, handling explosive materials on site, determining blast requirements and designing and arranging authorization for blast specification.
Scope	This unit/task covers the following: <ul style="list-style-type: none"> • Receive and handle explosive materials on-site • Determine the blasting requirements • Design and arrange for authorization of the blast specification
Working Conditions	<ul style="list-style-type: none"> • able to work in confined spaces, including underground • may also be required to work in remote areas where conditions can be hot, wet, dirty and dusty. • Need to wear protective clothing such as hard hats, safety boots and other safety equipment. • may be required to work shifts
Performance Criteria(PC) w.r.t. the Scope	
Element	Performance Criteria
Receive and Handle Explosive Materials On-Site	<p>PC1. Obtain all explosive materials correctly and check conformity with the requirements of the blasting specification.</p> <p>PC2. Complete the records accurately and make them available to authorised persons.</p> <p>PC3. Handle the explosive materials and move safely in accordance with operational and organisational procedures and relevant legislation requirements.</p> <p>PC4. Contain all explosive materials safely and securely and take precautions to avoid any loss or damage.</p> <p>PC5. Separate the explosives and detonators and handle them in conformity with operational and organisational rules and procedures and in accordance with relevant legislation.</p> <p>PC6. Apply the approved routes when transporting explosive materials.</p> <p>PC7. Display relevant danger notices in conformity with operational and organisational rules and procedures and with relevant legislation.</p>
Determine the blasting requirements	<p>PC8. Understand the location and area for blasting and requirements to conform with the overall development plans of the site</p> <p>PC9. Understand the quality and extent of mineral materials for removal and confirm with the relevant persons (e.g. manager; explosives supervisor; blasting team; contractors: geotechnical specialist) and the operational requirements</p> <p>PC10. Survey the geological makeup of the ground and mineral strata visually and evaluate for matching with the specified requirements</p>

MIN/ N0479 Receive and Handle Explosive Materials On-Site

	<p>PC11. Identify the geological anomalies of the blast site visually and take into account in the blast design</p> <p>PC12. Collect and record the dimensional information in accordance with the blast specification requirements</p> <p>PC13. Ensure that the output of the blast is confirmed to meet with the site requirements</p> <p>PC14. Determine the extent of the blast from the production requirements, the fragmentation and geological makeup of the ground and mineral strata, face provision and availability and drill size</p> <p>PC15. Understand the effects of a blast on plant, buildings, external features and the surrounding environment</p> <p>PC16. Understand the drill plan</p> <p>PC17. Identify the potential hazards and danger sources and record in the blast specification</p> <p>PC18. Carry out the work to approved procedures and practices and in compliance with statutory requirements</p>
<p>Design and arrange for authorization of the blast specification</p>	<p>PC19. collect information from previous blasts at the site and examine and evaluate information in determining the blast design</p> <p>PC20. analyse constraints and capabilities of plant and equipment used for moving and processing mineral materials and factor the same in the blast design</p> <p>PC21. determine types of explosive materials, method of initiation and blasting system and clearly stipulate in accordance with operational and organisation rules and procedures and compliance with legislative requirements</p> <p>PC22. ensure rules and procedures for the storing, transporting and handling of explosives are clearly established which comply with legislative requirements</p> <p>PC23. Ensure that requirements for safety and security of the blast operations are clearly identified and communicated</p> <p>PC24. Obtain authorisation of the blast specification in accordance with operational and organisational rules and procedures and comply with legislative requirements</p> <p>PC25. Communicate the agreed upon blast specifications to concerned stakeholders, in accordance with operational and organisational rules and procedures and comply with legislative requirements</p>
<p>Knowledge and Understanding (K)</p>	
<p>A. Regulatory context (knowledge of safety guidelines specified by Director</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. Different types of mines and detail of the mine he is working in</p> <p>KA2. Mine Organisation, time keeping, need for discipline and punctuality</p> <p>KA3. Benching in quarries, Dressing of overhangs, Undercuts, Fencing, First aid and Hygiene</p> <p>KA4. Standing orders in force at the mine. Safety in the vicinity of machinery</p> <p>KA5. Shot-firing and Safety regulations. How and where to take shelter</p> <p>KA6. Duties of workmen</p>

MIN/ N0479 Receive and Handle Explosive Materials On-Site

<p>General of Mine Safety (DGMS))</p>	<p>KA7. Provision of wages, working hours and accident compensation as per Mines act</p> <p>KA8. Knowledge of mining safety procedures</p> <p>KA9. Impact of violation of safely procedures</p>
<p>B. Organizational Context (Knowledge of the company / organization and its processes)</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KB1. relevant standards and procedures followed in the company</p> <p>KB2. different types of electrical requirements at the mine</p> <p>KB3. processes like Procurement, Store management, inventory management, quality management and key contact points for query resolution</p>
<p>C. Technical Knowledge</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KC1. the types and range of explosive materials, their strength and characteristics (to include explosives; detonating devices; blasting agents; blasting accessories)</p> <p>KC2. types of initiating systems</p> <p>KC3. effects on blast performance of variations in blast specification</p> <p>KC4. the approved procedures and practices in the context of the operations, the work activity and the workplace environment to include organisational; environmental; regulatory; emergency; operational.)</p> <p>KC5. the responsibilities of blaster and relevant others under the health and safety statutory requirements.</p> <p>KC6. the relevant legislation associated to the handling and movement of explosives.</p> <p>KC7. how to recognise detonator types and delays.</p> <p>KC8. the operational and organisational procedures and practices for handling and transport of explosives.</p> <p>KC9. the requirements for checking explosives type and condition.</p> <p>KC10. the reasons for, and location of, specified routes to be used when transporting explosive materials.</p> <p>KC11. understanding of relevant geotechnical information at the blast site</p> <p>KC12. digging/loading capability of blast site loading equipment</p> <p>KC13. strength and formation of mineral strata</p> <p>KC14. the potential dangers/ hazards during transportation.</p> <p>KC15. the safety procedures when loading and unloading explosive materials.</p> <p>KC16. the manufacturers' recommendations for handling explosives and detonators.</p> <p>KC17. the relevant legislation associated to the transport of explosives.</p> <p>KC18. the dangers associated with environmental conditions.</p> <p>KC19. the dangers of induced currents from external sources.</p>

MIN/ N0479 Receive and Handle Explosive Materials On-Site

Skills (S) [Optional]	
Element	Skills
Element A. Core Skills/ Generic Skills	Writing Skills
	The user/ individual on the job needs to know and understand how to: SA1. note down observations (if any) SA2. write information documents or enter the information in online ERP systems under guidance of the supervisor
	Reading Skills
	The user/individual on the job needs to know and understand how to: SA3. read and interpret symbols and measurements SA4. read information documents SA5. understand and analyse the available data about the site
	Oral Communication (Listening and Speaking skills)
B. Professional Skills	The user/individual on the job needs to know and understand how to: SA6. discuss task lists, schedules and activities SA7. effectively communicate SA8. attentively listen with full attention and comprehend the information given by various sources about the site
	Plan and Organize
	The user/individual on the job needs to know and understand how to: SB1. plan and organize the work order and jobs SB2. organize all process manuals so that sorting/ accessing information is easy
	Judgment and Critical Thinking
	The user/individual on the job needs to know and understand how to: SB3. use common sense and make judgments during day to day basis SB4. use reasoning skills to identify and resolve basic problems SB5. use intuition to detect any potential problems which could arise
	Desire to learn and take initiatives
	The user/individual on the job needs to know and understand how to: SB6. follow instructions and work on areas of improvement identified SB7. complete the assigned tasks with minimum supervision SB8. complete the job within timelines and quality norms
	Problem Solving and Decision making
	The user/individual on the job needs to know and understand how to: SB9. detect problems in day to day tasks SB10. discuss possible solution with the supervisor for problem solving SB11. make decisions in emergency conditions

National Occupational Standard

Overview

The unit covers checking blast sites prior to charging by checking the setting out and profiling of the drill holes, finalising the blast specifications and confirming the charge. Preparing the explosive materials and charging blast holes with the explosive materials. completing and checking the initiation circuit, clearing and securing the danger zone, sounding warning and fire blast and inspecting blast site after detonation. This unit also deals with misfires by identifying type and position of misfire, taking remedial action with misfires and recovering explosive materials

MIN/ N0480 Charge Blast Holes, Blast to Specification and deal with misfires

National Occupational Standard	Unit Code	MIN/ N 0480
	Unit Title (Task)	Charge Blast Holes, Blast to Specification and deal with misfires
	Description	This OS unit is about demonstrating competence to charge blast holes and blasting to specification. The unit covers checking blast sites prior to charging by checking the setting out and profiling of the drill holes, finalising the blast specifications and confirming the charge. Preparing the explosive materials and charging blast holes with the explosive materials. completing and checking the initiation circuit, clearing and securing the danger zone, sounding warning and fire blast and inspecting blast site after detonation. This unit also deals with misfires by identifying type and position of misfire, taking remedial action with misfires and recovering explosive materials
	Scope	This unit/task covers the following: <ul style="list-style-type: none"> • Charging blast holes to specification • Blasting to specification • Dealing with misfires
	Performance Criteria (PC) w.r.t. the Scope	
	Element	Performance Criteria
	Charging blast holes to specification	PC1. Check each blast hole is checked for condition, dimension, angle, inclination and direction, as appropriate, to ensure it is suitable for charging to the blast specification. PC2. Identify, record and report any variations to the blasting specification and confirm with the appropriate persons. PC3. Prepare the required quantities of explosives in accordance with the blast specification PC4. Check the explosives to ensure they conform, in quantity and type, to the blasting specification. PC5. Charge the blast holes in accordance with the blasting specification PC6. Place detonators and primers accurately in conformity with the blasting specification PC7. Identify and report the variations between the specification and the actual conditions at the time of charging in conformity with operational and organizational rules and procedures PC8. Return the explosive materials which are surplus to requirements to store and correctly package and label and maintain the records PC9. Interpret and implement the approved procedures and practices for disposal of surplus materials
	Blasting to specification	PC10. Connect the ignition system for the explosive accurately in conformity with the blast specification PC11. Protect the connections against adverse environmental conditions, premature ignition and mechanical damage PC12. Implement operational safety procedures whilst preparing the initiation circuit and connecting the ignition system in conformity with approved procedures and practices PC13. Check the ignition system and initiation sequences thoroughly in accordance with operational and organizational rules and procedures and relevant legislation

MIN/ N0480 Charge Blast Holes, Blast to Specification and deal with misfires

	<p>PC14. Clear and secure the specified danger zone effectively in compliance with operational and organizational rules and procedures and the blast specification</p> <p>PC15. Provide clear notification to public of intention to fire the explosive</p> <p>PC16. Maintain security of exploder in compliance with relevant explosives regulations, operational and organizational rules and procedures</p> <p>PC17. Fire the explosive when all safety precautions have been taken and verified</p> <p>PC18. Inspect the blast area (including where applicable, the face, crest and pile) thoroughly in accordance with site rules and operational procedures</p> <p>PC19. Provide the all clear on satisfaction that the area is safe and the blasting operation is complete</p> <p>PC20. Record the type and quantity of explosive materials and means of initiation in accordance with organizational and operational procedures</p>
Blast to specification	<p>PC21. Recognize misfires correctly and communicate to appropriate person(s)</p> <p>PC22. Clearly mark the located misfire in accordance with operational and organisational rules and procedures</p> <p>PC23. Secure the exclusion zone in conformity with operational and organisational rules and procedures</p> <p>PC24. Record and report the method of dealing with the misfire clearly and accurately in accordance with operational and organisational procedures</p> <p>PC25. Secure the area of recovery for unexploded explosive and isolate until recovery has been carried out and the area made safe</p> <p>PC26. Ensure that the method of recovery used for unexploded charges minimises the risk of accidental initiation and is in conformity with operational and organisational rules and procedures for misfires</p> <p>PC27. Ensure that explosives and detonating devices are recovered and disposed of correctly and safely</p>
Knowledge and Understanding (K)	
<p>A. Regulatory context (knowledge of safety guidelines specified by Director General of Mine Safety (DGMS))</p>	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. Different types of mines and detail of the mine he is working in</p> <p>KA2. Mine Organisation, time keeping, need for discipline and punctuality</p> <p>KA3. Benching in quarries, Dressing of overhangs, Undercuts, Fencing, First aid and Hygiene</p> <p>KA4. Standing orders in force at the mine. Safety in the vicinity of machinery</p> <p>KA5. Shot-firing and Safety regulations. How and where to take shelter</p> <p>KA6. Duties of workmen</p> <p>KA7. Provision of wages, working hours and accident compensation as per Mines act</p> <p>KA8. Knowledge of mining safety procedures</p> <p>KA9. Impact of violation of safely procedures</p>

MIN/ N0480 Charge Blast Holes, Blast to Specification and deal with misfires

B. Organizational Context (Knowledge of the company / organization and its processes)	<p>The user/individual on the job needs to know and understand:</p> <ul style="list-style-type: none"> KB1. relevant standards and procedures followed in the company KB2. different types of electrical requirements at the mine KB3. processes like Procurement, Store management, inventory management, quality management and key contact points for query resolution
C. Technical Knowledge	<p>The user/individual on the job needs to know and understand:</p> <ul style="list-style-type: none"> KC1. the types and range of explosive materials, their strength and characteristics (to include explosives; detonating devices; blasting agents; blasting accessories.) KC2. Types of initiating systems KC3. types of detonating devices and explosives used. KC4. delayed detonators and how the delay is created. KC5. how to identify and deal with faults that cannot be rectified KC6. types of approved circuit testers KC7. initiation sequences for blasting patterns and the possible effects on the time delay period between individual charges KC8. blast patterns KC9. circuit testing for electrical initiation KC10. types of initiation and premature ignitions KC11. types and uses of blasting/shotfiring equipment KC12. Causes of and dangers from flyrock KC13. warning systems deployed at the blast site (e.g. site radio; siren; flags; hand signals; warning signs.) KC14. the issues likely to arise from the blast operation KC15. recognition of various types of misfires and relevant action to be taken KC16. hazards associated with misfires and unexploded charges KC17. reasons for post blast slippage of ground and its effects KC18. dangerous effects of fumes created by blasting KC19. acceptable conditions for the post blast area (including when applicable face, crest, pile, area.) KC20. Understand the monitoring process for recordings of ground vibration/air over pressure KC21. hazards associated with misfires and unexploded charges KC22. systematic testing to reveal location of faults in a circuit KC23. recognition of undisturbed ground and indications of unfired charges after blasting KC24. calibration requirements for exploders KC25. Marking of misfires KC26. Types, causes and avoidance of misfires KC27. safe methods of handling and disposal of explosive materials recovered from the site KC28. desensitisation of bulk/loose grain explosives KC29. the approved procedures and practices in the context of the operations, the work activity and the workplace environment to include organisational; environmental; regulatory; emergency; operational.) KC30. the responsibilities of blaster and relevant others under the health and safety statutory requirements.

National Occupational Standard

Overview

This unit is about health and safety measures critical in mines

MIN/ N0901 Health and Safety

National Occupational Standard	Unit Code	MIN/N 0901	
	Unit Title (Task)	Health and Safety	
	Description	This unit is about health and safety measures critical in mines	
	Scope	This OS unit/task covers the following: <ul style="list-style-type: none"> Health and safety measures critical in mines 	
	Performance Criteria (PC) w.r.t. the Scope		
	Element	Performance Criteria	
	Safety, Security and Administrative	To be competent, the user/individual on the job must be able to:	
		PC1. Comply with occupational health and safety regulations adopted by the employer.	
		PC2. Follow mining operations procedures with respect to materials handling and accidents	
		PC3. Follow the correct safety steps in case of accident or major failure	
PC4. Comply with safety regulations and procedures in case of fire hazard.			
PC5. Operate various grades of fire extinguishers.			
PC6. Work responsibly and as safe and careful as possible so as not to put the health and safety of self or others at risk, including members of the public			
PC7. Perform storage and transport of hazardous materials compliant with safety guidelines prescribed by DGMS.			
PC8. Deal with misfires as per statutory requirement			
PC9. Identify characteristics of post-blast fumes and take necessary precautions.			
PC10. Wears safety gear such as hard hat, respiratory protection, eye protection, ear protection			
PC11. Follow the manufacturer's instructions for care and safe operation of the equipment.			

MIN/ N0901 Health and Safety

Knowledge and Understanding (K)
