

QUALIFICATIONS PACK - OCCUPATIONAL STANDARDS FOR TEXTILE SECTOR

What are Occupational Standards(OS)?

- OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

Introduction

Qualifications Pack - Stenter Machine Operator

SECTOR: TEXTILE

SUB-SECTOR: PROCESSING

OCCUPATION: FINISHING

REFERENCE ID: TSC/Q 3901

ALIGNED TO: NCO-2004 / 8264.81

Brief Job Description: A Stenter Machine Operator is responsible to do the specified job of drying, heat setting and finishing of fabric with proper control of parameters to get the desired effect. This job requires the individual to have thorough knowledge of process flow and material flow in a processing mill for fabric production and should know the important functions and operations of a Stenter machine.

Personal Attributes: A Stenter Machine Operator should have good eyesight, matching skills and vision. He/she should also have good interpersonal skills.

Overview

This unit is about taking charge of shift and handing over shift to operator

National Occupational Standards

TSC/N 5401

Taking charge of shift and handing over shift to operator

Unit Code	TSC/N 5401		
Unit Title			
(Task)	Taking charge of shift and handing over shift to operator		
Description	This unit is about taking charge of shift from previous shift operator and relieving		
	the responsibilities to the next shift operator		
Scope	This unit/task covers the following:		
	taking charge of shift		
	handing over shift		
Elements	Performance Criteria		
Taking charge of shift	To be competent, you must be able to:		
	PC1. come at least 10 - 15 minutes earlier to the work place		
	PC2. bring the necessary operational tools to the department		
	PC3. meet the previous shift operator and discuss with him/ her regarding the issues faced by them with respect to the quality or production or spare or safety or any other specific instruction etc.		
	PC4. understand the fabric being processed & process running on the machine		
	PC5. ensure the technical details are mentioned on the job card display on the		
	machine		
	PC6. check for the availability of the spare trolley for unloading the fabric		
	PC7. check the next batch to be processed is ready near the machine		
	PC8. ensure the required dyes & chemicals are already weighed & prepared		
	PC9. check the cleanliness of the machines & other work areas		
	PC10. question the previous shift operator for any deviation in the above and		
	bring the same to the knowledge of his/ her shift superior as well that of		
	the previous shift as well.		
Handing over shift	To be competent, you must be able to:		
	PC11. hand over the shift to the incoming operator in a proper manner		
	PC12. ensure in providing the details regarding fabric quality & the process		
	running on the machine		
	PC13. to provide all relevant information regarding the stoppages or breakdown in the machine, any damage to the fabric or machine.		
	PC14. ensure the empty trolley is near the machine for unloading the fabric		
	PC15. ensure the next lot to be processed is ready near the machine already		
	stitched & arranged properly		
	PC16. ensure the required dyes & chemicals for the next lot or next process are		
	weighed & prepared		
	PC17. get clearance from the incoming counterpart before leaving the work spot		
	PC18. report to his/ her shift superiors as well as that of the incoming shift		
	operator in case his/ her counterpart doesn't report for the incoming shift		
	PC19. ensure the shift has to be properly handed over to the incoming shift		
	operator		
	PC20. report to his/ her shift superior about the quality / production / safety		

Taking charge of shift and handing over shift to operator

	issues/ any other issue faced in his/ her shift and should leave the		
	department only after getting concurrence for the same from his/ her		
	superiors		
	PC21. collect the wastes from waste collection bags, weigh them and transport to		
	storage area		
	PC22. ensure the machine and its work place is clean		
Knowledge and Understanding (K)			
A. Technical	You need to know and understand:		
Knowledge	KA1. the importance of quality & productivity		
	KA2. various defects in the fabric due to yarn, weaving or processing		
	KA3. reasons for various defects in the fabric due to processing & their remedy		
	KA4. process flow in a processing unit		
	KA5. material flow in a processing unit		
	KA6. functions of various controls of the machine		
	KA7. importance of material handling and types of material handling equipment		
	being used		
	KA8. importance of cleanliness at workplace		
	KA9. functions and methodology for operating different material handling		
	equipment		
	KA10. the functions of various alarm signals		
	KA11. guidelines for operating the machine		
	KA12. guidelines for taking charge of shift from previous shift operator		
	KA13. guidelines for handing over the shift to the next shift operator		
	KA14. safety procedures to be followed while operating the machine

Maintain health, safety and security at work place

National Occupational Standard

Overview

This unit is about maintaining health, safety, and security standards at workplace.

Planning the safety

TSC/ N9003	Maintain health, safety and security at work place
Unit Code	TSC/ N9003
Unit Title (Task)	Maintain health, safety and security at work place
Description	This unit provides performance criteria, knowledge & understanding and skills & abilities required to comply with health, safety and security requirements at the workplace and covers procedure to prevent, control and minimize risk to self and others.
Scope	 This unit/task covers the following: comply with health, safety and security requirements at work recognizing the hazards planning the safety techniques implementing the programs
Performance Criteria (F	•
Elements	Performance Criteria
Comply with health, Safety and security requirements at work	To be competent, operator must be able to: PC1. comply with health and safety related instructions applicable to the workplace PC2. use and maintain personal protective equipment such as "ear plug" "nose mask "head cap" etc., as per protocol PC3. carry out own activities in line with approved guidelines and procedures PC4. maintain a healthy lifestyle and guard against dependency on intoxicants PC5. follow environment management system related procedures PC6. identify and correct (if possible) malfunctions in machinery and equipment PC7. report any service malfunctions that cannot be rectified PC8. store materials and equipment in line with organisational requirements PC9. safely handle and remove waste PC10. minimize health and safety risks to self and others due to own actions PC11. seek clarifications, from supervisors or other authorized personnel in case of perceived risks PC12. monitor the workplace and work processes for potential risks and threat PC13. carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned PC14. report hazards and potential risks/ threats to supervisors or other authorized personnel PC15. participate in mock drills/ evacuation procedures organized at the workplace PC16. undertake first aid, fire-fighting and emergency response training, if asked to do so PC17. take action based on instructions in the event of fire, emergencies or accidents PC18. follow organisation procedures for shutdown and evacuation when required
Recognizing the hazards	To be competent, you must be able to: PC19. identify different kinds of possible hazards (environmental, personal, ergonomic, chemical) of the industry PC20. recognise other possible security issues existing in the workplace

PC21. recognise different measures to curb the hazards

Assessment criteria

Job Role: Stenter Machine Operator

Qualification Pack: Stenter Machine Operator Sector Skill Council: Textile Sector Skill Council

Guidelines for assessment :-

- 1. Criteria for assessment for each qualification pack will be created by the Sector Skill Council. Each performance criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for theory & skill practical for each PC.
- 2. The assessment for the theory part will be based on knowledge bank of question created by the SSC.
- 3. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training centre (as per assessment criteria below).
- 4. To pass the qualification pack, every trainee should score a minimum of 80%.

National Occupational	Performance Criteria (PC)	Total Marks	Ou t	Marks	Allocation					
Standards (NOS)			Of	Theor y	Skills Practica	Viva				
1. TSC/N 5401 Taking	PC1. come at least 10 - 15 minutes earlier to the work place	42	2	0	2	0				
charge of shift and	PC2. bring the necessary operational tools to the department		1	0	1	0				
handing over shift to operator	PC3. meet the previous shift operator and discuss with him/ her regarding the issues faced by them with respect to the quality or production or spare or safety or any other specific instruction etc.		3	0	2	1				
	PC4. understand the fabric being processed & process running on the machine						3	1	1	1
	PC5. ensure the technical details are mentioned on the job card display on the machine			3	1	1	1			
	PC6. check for the availability of the spare trolley for unloading the fabric		1	0	1	0				
	PC7. check the next batch to be processed is ready near the machine		1	0	1	0				
	PC8. ensure the required dyes & chemicals are already weighed & prepared		1	0	1	0				
	PC9. check the cleanliness of the machines & other work areas		2	0	2	0				

			1000		
PC10. question the previous shift		2	0	2	0
operator for any deviation in the above					
and bring the same to the knowledge of					
his/ her shift superior as well that of the					
previous shift as well.					
PC11. hand over the shift to the		1	0	1	0
incoming operator in a proper manner					
PC12. ensure in providing the details		3	2	0	1
regarding fabric quality & the process					
running on the machine					
PC13. provide all relevant information		2	0	2	0
regarding the stoppages or breakdown					
in the machine, any damage to the					
fabric or machine.					
PC14. ensure the empty trolley is near		1	0	1	0
the machine for unloading the fabric
